

February, 19, 2019

Attendance; Regina, Naum, Lucas, Daeyeong, Dr. Totushek, Alex, John

Budget for 2019 to 2020 was addressed, we will be finalizing the summary of it next week, on the 26th before it is due on that following Friday. We are looking at the summary of Travel, Capital, and Food, and will fully flesh it out next week.

We will be having another speaker that Dr. Rosenberg has found, named Allison ---. Her talk is more specific for business and math & computer science club. The talk would specifically about Actuarial Science, which involves cost risk analysis, essentially calculating the odds for something to be worth it. We will consider when would be best for her to come and give her talk, this will likely occur after Spring Break. Options we could consider; March 29, April 5, and April 12 will be our main goals, so we can have a dinner afterwards.

Math Meet, (April 10th) we need the shirt design by the start of March, we need volunteers, all volunteers will get a free math meet shirt. Email sent out from the club asking for them, specifically for people from MCS Club, and we want representatives from our club, that will have a table with give away. Such that we can engage more people into the club and see what we are all about. The event is from 8 a.m to 2 p.m, and we'd like to have a slide show put together about what we have done, and why club members got into math and computer science.

Send out email that includes information about conferences that Sergei will take us to. This will be figured out by John, and Lucas.
